

What's New?

January 2012 Enhancements

You asked and we listened...

Kuder® is excited to announce the addition of four system features, which have been requested by you. We hope you find these additions useful to both you and your system users.

Duplicate Account Pop-Up

When a user registers for either *Kuder® Navigator* or *Kuder® Journey*, the system will check for existing records that match certain criteria. If there is a match, a pop-up message and table containing the user name(s) that match will be displayed. The user can then choose an existing user name and will be prompted for his or her password, or request that the password be e-mailed to the address on file for that account. If the user does not want to choose one of the existing user names from the table, he or she can still continue to register with a new account. This new checkpoint will help reduce the amount of users who register for multiple accounts.

Retaking Assessment Message

For both *Navigator* and *Journey*, new processes have been implemented to alert users when they have already taken an assessment within a 12-month time frame. If the user attempts to take an assessment, a pop-up message will remind him or her that the assessment has already been taken and ask if the user wants to continue on to retake that particular assessment. The user can choose to view the assessment results, or continue on to retake the assessment.

ADMS Education Plan Report

Under the Reports tab in the *Kuder® Administrative Database Management System*, administrators can run a variety of reports on education plans their users have created. Now, the report results can be exported to CSV format for use in an Excel spreadsheet or other similar format. Once the filters for the report have been chosen and the "View Report" button has been selected, an "Export to CSV" button is available at the top of the page next to the "Print Preview" button.

Activation Codes

Activation Codes for *Navigator* and *Journey* users are now much easier to find. A hyperlink to the codes can be found under the My Profile section on the right side of the *Kuder® Administrative Database Management System* home page. The list of codes has also been limited to the "N" and/or "J" codes. Codes for the *Kuder® Career Search with Person Match*, *Kuder® Skills Assessment*, and *Super's Work Values Inventory-revised* are still available by using the drop down menu at the top of the Activation Codes page.
