

# SET STUDENTS UP FOR SUCCESS.

For college-bound students, Kuder Navigator® can feature an additional suite of resources and activities designed to help you guide students (and families!) through every aspect of the postsecondary planning and decision-making process, including:

## Test Preparation & Practice Tools

From within Navigator, students can seamlessly access, complete, save, and review ACT/SAT prep courses, practice tests and materials, AP course study guides, and more. This entire add-on package is more affordable per student than your typical test prep course.

## College Match

This quick and easy calculator shows students how four-year schools across the country align with their academic achievements, financial circumstances, and goals. It gives them a realistic view on what it costs and takes to gain acceptance into the college of their dreams ... and this information is not only based on students from their school.

## Application & Scholarship Tracking

Students stay-on-track to college by logging important deadlines and milestones — all of which is saved to students' portfolio and can be viewed and reported on by teachers and counselors!

## Transcript & Document Requests

Colleges require high school transcripts and, often times, letters of recommendation. Students can request transcripts from directly within Navigator and upload all letters of recommendation to review and share.
