

SET STUDENTS UP FOR SUCCESS.

This extension to Kuder Navigator® offers an additional suite of resources and activities designed to help you guide students (and families!) through critical aspects of exploring, preparing, and planning for college and university education.

Test Preparation & Practice Tools

Students can seamlessly access, complete, save, and review Peterson's ACT/SAT/PSAT/ASVAB/GED prep courses, practice tests and materials, AP course study guides, and more. The entire College Access Package is more affordable per student than one typical test prep course.

College Match

This quick and easy calculator by College Raptor shows schools across the country that meet each student's unique academic and financial goals. It gives them a realistic view on their admissions likelihood (safety, match, and reach) and the differences between sticker price and estimated net price to determine their debt burden.

Application & Scholarship Tracking

Students can easily manage important scholarship and college application deadlines, activities, milestones, and tasks through use of Common App and direct submissions. All supporting data for college and scholarship applications is saved to students' portfolios and can be viewed and reported on by counselors, teachers, and education administrators!

Transcript & Document Requests

Colleges require high school transcripts and, often times, letters of recommendation. Through our partnerships with Parchment and Common App, students can request transcripts and recommendations directly within Navigator to support their college and university applications.
